## Your feedback

Your views about these proposed changes are important to us.

### Why we want to hear from you

Before we make a decision on our proposed changes to the bus network, we need to know the community's needs and views.

So make sure you have your say.

### What you need to consider

We encourage you to think carefully about the proposed new bus network, which is detailed on the reverse of this page. We would like your feedback on any part of the proposal that may affect you.

### How we design a bus network

We are dedicated public transport providers and we design our services for your ease of use and convenience.

When designing bus services we balance the needs of our many and varied customer groups.

So that we have a clear view of what's happening within an area, we review travel patterns, emerging trends, information on journeys to work and land use developments.

Community consultation allows us to gather your responses and use this feedback along with input from our stakeholders to review our proposals.

## Proposed changes

The proposed changes would improve services in Cessnock and Kurri Kurri by:

- Introducing new route 165 Cessnock Hoppa service linking West Cessnock, Cessnock Hospital, East Cessnock and Cessnock Town Centre on weekdays.
- Modifying all bus routes in Cessnock Town Centre to operate via Cooper St, North Ave and Darwin St, to provide better access to the shopping centre and leagues club – buses would still operate along Vincent St south of Cooper St.
- Extending route 167 Nulkaba service to South Cessnock, and making route 162 services from Abernethy and Aberdare more direct instead of diverting via South Cessnock.
- Introducing new weekday services between Abermain and Kurri Kurri on route 171, operating via Weston and Kurri Kurri Hospital.
- Introducing new weekday services between Heddon Greta and Kurri Kurri on route 172, also serving Stanford Merthyr and Pelaw Main.
